Experiencia

Lumo

Senior Frontend Engineer
julio de 2023 - Present (4 meses)
United States

Lumo is an IoT company that help growers to control, measure, and monitor irrigations from their computer or smartphone.

Clovers

Senior Frontend Engineer
noviembre de 2021 - junio de 2023 (1 año 8 meses)
United States

Clovers is a hiring intelligence platform.

- Build the core web application of the business and report to CTO directly.
- Create a Microsoft Teams app to take notes and highlight moments while interviewing candidates.
- Build a React component library based on the design system guidelines to reduce duplicate code and keep consistency across multiple apps. This helped us to deliver new product features faster.

Amazon

Software Development Engineer II
septiembre de 2019 - noviembre de 2021 (2 años 3 meses)

California, United States

SDE-2 at Ring (Amazon Devices).

- Build from scratch and launch the Neighbors Public Safety Service (NPSS) web application for Law Enforcement Officers. They can receive alerts within your jurisdiction or request access to video recordings of Ring cameras.
- Build from scratch and launch the first web-compatible application of Ring Neighbors, a realtime social network for Ring users. They can post safety or crime alerts of their neighborhood.
- Build a landing page for Ring Better Neighborhoods fully self-maintained with Contentful and its Content Delivery GraphQL API.
- Make on-call shifts and present weekly operation excellence reports.
- Build the first React Component library for Ring web applications.

Codementor

Mentor

marzo de 2019 - noviembre de 2019 (9 meses)

United States

Platform that connects mentors with mentees.

- Guide people within the path of becoming a software engineer.
- Explain fundamentals of computer science.
- Teach mostly Javascript and React.
- Get short-term freelance projects done.

Here is my profile where you can see what customers who worked with me think:

Sirena

Frontend Developer

octubre de 2018 - septiembre de 2019 (1 año)

Buenos Aires Province, Argentina

Sirena is a tool that helps you to increase your sales with the simplicity and agility of a conversation.

- Build a Conversational UI in the Sirena platform. This feature provides to sales team the ability to chat in realtime with potential customers of their businesses. Think of it as WhatsApp Web but with lots of great features on top e.g meeting scheduling, templates messaging, alerts, reminders.

- Own the Conversational UI team. Attend weekly meetings to sync up with the team and show what's the progress.

Cuponstar

Full-stack Developer

octubre de 2016 - septiembre de 2018 (2 años)

Buenos Aires Province, Argentina

Provide corporate benefits for your employees through our HR loyalty platform.

- Build a Progressive Web Application with server-side rendering and offline-mode.
- Create a library of reusable native web components built on top of Stencil.js.
- Build multiple marketing landings pages for each Cuponstar product.
- Interview potential candidates for Full-stack Developer positions.
- Present tech talks about Atomic Design, Web Components and GraphQL.

Fizzmod

UI Developer

noviembre de 2015 - octubre de 2016 (1 año)

Buenos Aires Province, Argentina

Fizzmod is a digital agency that builds solutions for e-commerces.

- Build multiple high-volume traffic online stores for big latam companies: Sony, Fravega, Rosen, etc.
 - Customer facing: implement new features or fix bugs on demand.
 - Attend on-call shifts when HotSale, HotWeek, CyberMonday, Black Friday events occur.
-
