Natalie Le

Project Engineer at Swinerton Construction
Los Angeles, California, United States

Summary

As a graduate from USC, I have completed my Bachelor of Science in civil engineering with an emphasis in building science. It is with my appreciation for architecture and engineering that I enter the AEC industry as a project engineer in construction management. I have experience with student outreach, leadership, and event planning from my two part time jobs during college as well as numerous executive board positions. I plan to eventually go back to school to receive my MBA after several years of working in industry.
